Badminton Tournament Manager App

AI-Generated UI Design Prompts for Google Stitch

Theme: Warm & Friendly (Cream + Teal + Amber)

Color Role	HEX Code	Usage
Primary (Teal 700)	#00796B	Buttons, highlights, navigation
Accent (Amber 600)	#FFB300	Call-to-action and match status
Background (Cream)	#FFFBE6	App background
Text Primary	#212121	Main typography
Text Secondary	#616161	Sub-labels and details

ADMIN UI PROMPTS

■ Tournament Dashboard

Design an admin dashboard for a badminton tournament management web app using Material 3. Show tournament summary cards (Ongoing, Upcoming, Completed), player count, and total matches. Include a navigation sidebar with icons and a top bar showing the admin profile. Use a creamy primary color with teal accent highlights.

■ Player Management

Create an admin page for managing players in a badminton tournament app. Show a searchable, sortable player list with name, category, ranking, and edit/delete icons. Include an 'Add Player' floating button. Use card-based Material 3 design with creamy and light-gray background shades.

■ Match Scheduling

Generate a web UI screen for scheduling matches in a badminton tournament. Include dropdowns for selecting category and court, date/time picker, and a table showing assigned matches. Show a 'Generate Schedule' button. Use Material 3 layout with creamy primary tone and subtle shadow cards.

■ Court Assignment

Design an admin interface for assigning matches to courts in a tournament. Show a grid of courts with color indicators (Available, Ongoing, Completed). Each court card shows match number, player names, and start time. Use a creamy base theme and accent colors for status indicators.

■ Bracket & Draw View

Create a bracket visualization screen for an admin web dashboard. Use a horizontal knockout bracket layout with round labels (Quarterfinal, Semifinal, Final). Include a toolbar with filters for category and gender. Apply a creamy Material 3 palette with subtle colored lines.

USER UI PROMPTS

■ Home / Tournament Overview

Design a user home screen for a badminton tournament web app. Show upcoming tournaments, player's current matches, and recent results in card format. Include bottom navigation tabs (Home, Matches, Results, Profile). Use creamy primary color and soft contrast backgrounds.

■ Match Schedule (User View)

Create a schedule page for players showing their upcoming and completed matches. Each card shows opponent, time, and court number with a colored status chip (Upcoming, Ongoing, Finished). Keep it clean and readable with Material 3 list components.

■ Leaderboard

Design a leaderboard screen showing top players by category and ranking points. Include search, filters for category, and medal icons for top 3 players. Use a creamy theme with golden accent for top ranks.

■ Profile & Stats

Generate a player profile page showing photo, name, matches played, wins/losses, and badges earned. Include buttons for editing profile and viewing match history. Use circular avatars, Material 3 cards, and creamy-teal theme.

■ Live Scoreboard (Spectator View)

Create a responsive live-scoreboard screen for ongoing badminton matches. Show player names, scores, court number, and match status. Use high-contrast typography on creamy background for visibility.
